Div:B , Sem:8th

Date	Topic Name	Description
10/02/2025	**Implement Profile page for login authentication**	**In this module, I implemented the Profile Page, which allows users to manage their personal information. Users can view and update their details as needed. Additionally, I integrated functionalities for logging out and account deletion, ensuring a seamless user experience and secure profile management.**
11/02/2025 to 15/02/2025	**Implemented the Home page and admin dashboard.**	**In this Module I Implemented the home page of user and admin dashboard and also worked on database connectivity. And enhanced the home page using CSS/Bootstrap.**
17/02/2025	**Implement Drag and Drop**	**In this module, I implemented a drag-**

		and-drop functionality that allows users to seamlessly update the status of leads by moving them between different categories. This enhances the user experience by providing an intuitive and efficient way to manage lead progression.
18/02/2025	**Implement Email Box**	**In this module, I developed a mailbox feature that enables users to send email messages. The UI is designed using DaisyUI and Material UI, ensuring a visually appealing and user-friendly interface. This functionality enhances communication efficiency within the application.**
19/02/2025 to 20/02/2025	**Implement Login Signup Page**	**In this module, I implemented the Login, Signup, Forgot Password, and Verification Code pages using Hero UI. This ensures a seamless and visually appealing authentication experience while enhancing the security and accessibility of the application.**
